Projects

Full Store Setup & Theme Development

Planned, designed, and launched complete Shopify stores for small to mid-sized businesses (1K–10K+ monthly visitors), setting up everything from theme setup to payment, product, and shipping configuration.

Theme & Custom Section Development

Developed and customized Shopify themes (Focal, Impulse, Prestige) using Liquid, HTML, CSS, JavaScript and Liquid. Built custom sections for product highlights, sliders, popups, and metafield-based features editable via the Theme Editor.

Bug Fixing & Customization

Diagnosed and solved problems in the front-end and back-end, across different stores, which included layout bugs, Liquid errors. Customized existing sections to suit unique branding and functionality requirements.

Shopify Apps Integration

Shopify app store third party Shopify apps integration.
